

# What's the fuss about flash? Stop bluffing and get the facts

Brought to you by HP and Intel®

#### Why are we here?

# Where and how can flash be deployed?

# On our Regcast today

**Phil Hooker HP** 

**James Hall HP** 

**Tony Lock** Freeform Dynamics

**Tim Phillips** The Register

# What's happening in storage?

More data is being created and stored

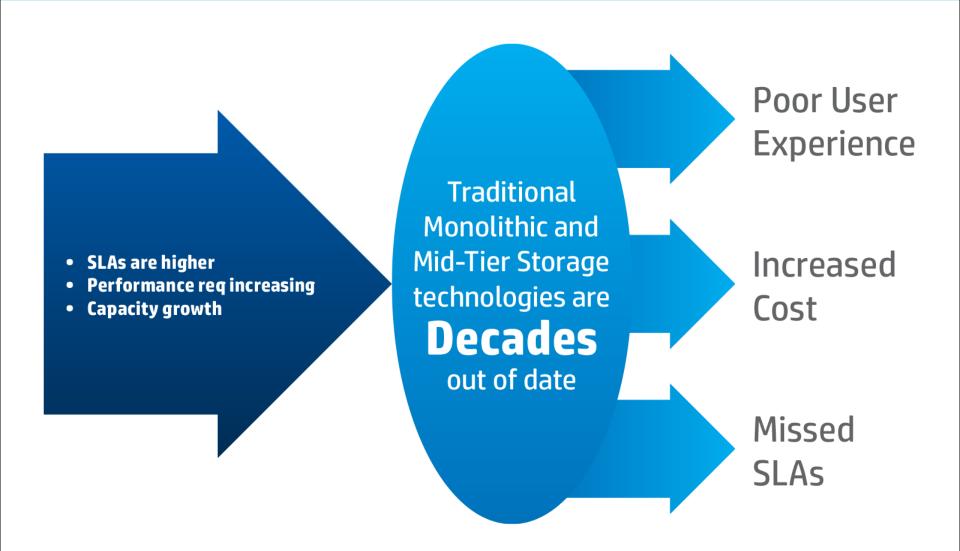

The cost of storage is growing and becoming visible to the business

Storage performance and bottlenecks are now recognised as an issue

Storage skills are scarce and human resources are stretched

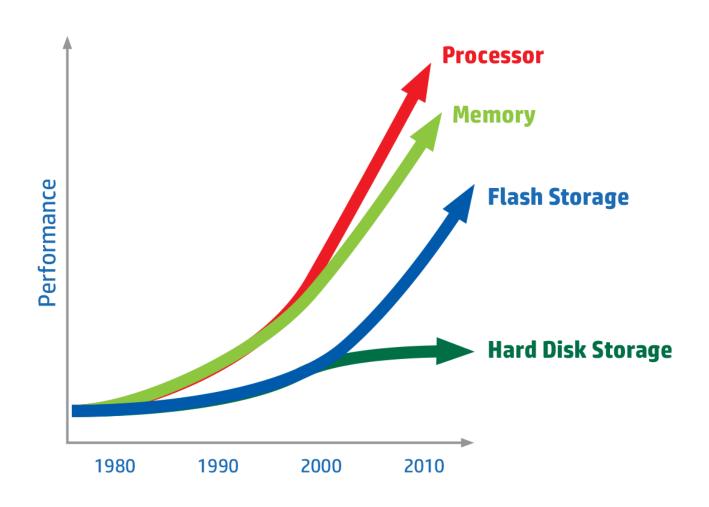

# **Customer challenges**

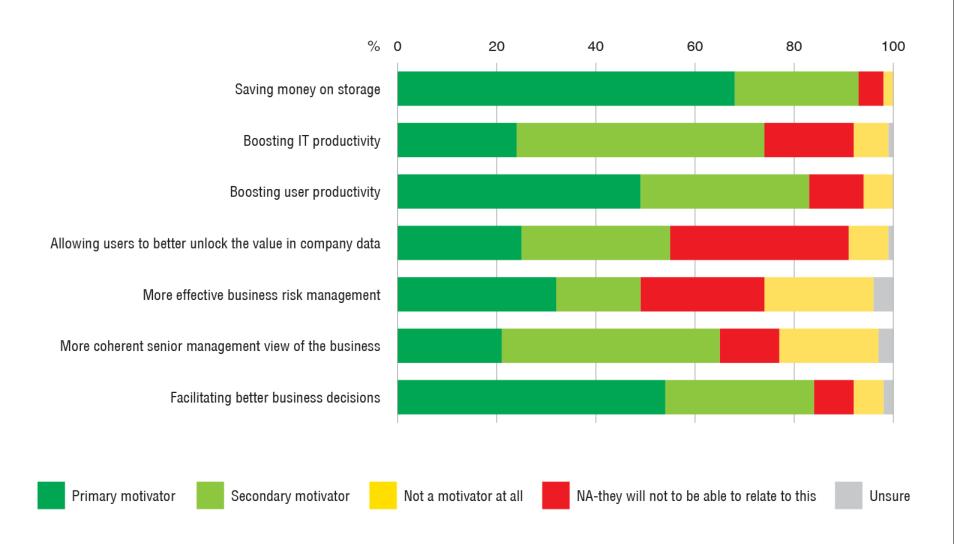

# What is driving the need for Flash?

#### Would you consider the following to be drivers for business stakeholders?

#### **Understand the basics**

# Creation or acquisition Shorter term relevance, sensitivity and criticality Creation or acquisition Creation or acquisition Shorter term relevance sensitivity and criticality Ultimate disposal and criticality

- Information management needs change over time
- Timescales and needs vary by type of data

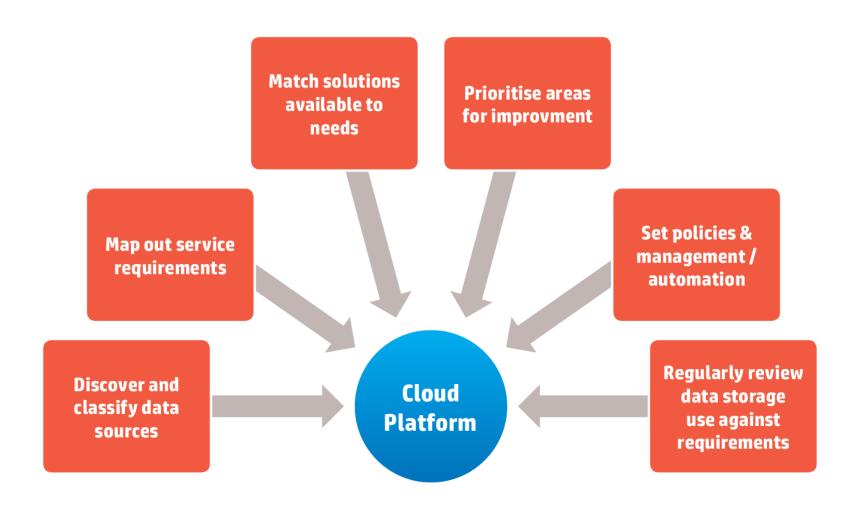

Requirements for policies, processes and tools

#### Principles of storage deployment

# **Flash Perceptions**

# Flash Technologies

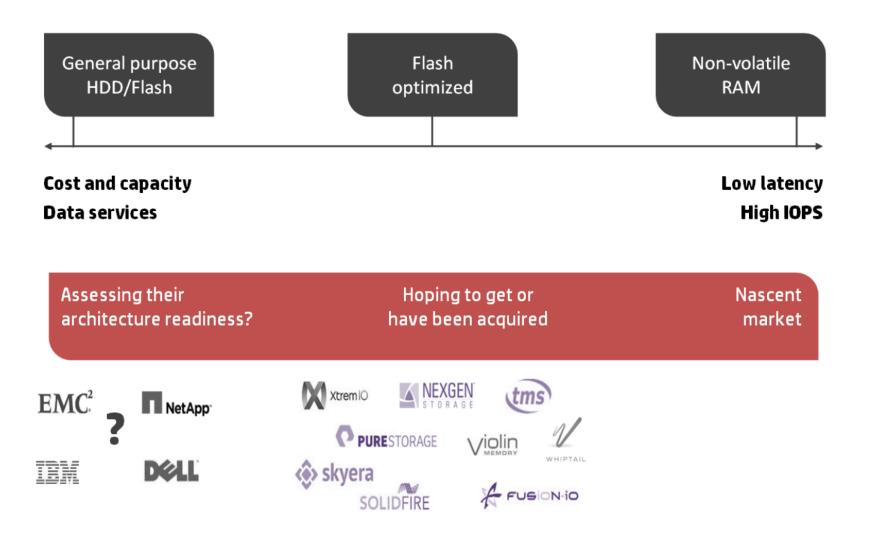

SLC Flash High IOPs, High Wear, \$\$\$

MLC Flash Medium / High IOPs, Medium Wear, \$\$

TLC Flash Low IOPS, Low Wear \$

# The industry is trying to respond to the new reality

#### **Flash Deployment Models**

Server Flash Cache All Flash array

Tiered Flash array

Storage Flash Cache

#### What are the day 1 design requirements for flash

#### Flash Use Cases

#### All Flash

- Desktop Virtualisation
- Business Critical Databases
   Server Virtualisation
- Data Analytics

#### Tiered Flash

- Enterprise Applications
